DETAILED ACTION

Claims 1-10 are pending in the instant application. Receipt of the amendment and applicant's argument on 8/22/03 is acknowledged. Receipt of the information disclosure statement on 6/2/03 is acknowledged.

The following are new rejections.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claimed invention is drawn to compounds identified by the method of claim 1, and the specification discloses an example of a compound within the scope of what is claimed (L- methionine, page 11 of the specification). However, there is no evidence that there is any *per se* structure/function relationship between the disclosed compound that binds $\alpha 2\delta$ and any others that might be found using the claimed method. Structural

identifying characteristics of the genus members are not disclosed. Therefore, the claimed invention is not supported by an adequate written description.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Thurlow et al. (J. European Pharm., 247, 341 (1993), cited by applicants).

Thurlow et al. disclose L-methionine, and its binding to the $\alpha 2\delta$ subunit. By applicant's admission (page 11 of the specification), L-methionine binds to the $\alpha 2\delta$ subunit and would be identified by the methods recited in claims 1 or 10.

Claims 1-8 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nancy Vogel whose telephone number is (703) 308-4548. The examiner can normally be reached on 7:30 - 4:00, Monday - Friday.
